7. SITUATION SUMMARY

COMMUNITY LIFELINE STATUS

CURRENT CONDITIONS/ OVERVIEW

Current Conditions:	Continuing to support personnel at the incident and coordinate resources between agencies.
Overview:	SAR continues searching for missing persons. The Mass Care Unit continues to work with multiple agencies to streamline and organize the volunteer coordination and donations management. There was a large influx of individuals wanting to volunteer which caused traffic congestion and confusion. A makeshift parking lot was created to address some of the traffic and parking problems. Mass Care continues to provide services to individuals affected by the flood at the Resources Recovery Center. TNR is working to complete a low water crossing bridge at Big Sandy Creek, as well as debris management. Transportation continues to coordinate getting individuals affected by the flooding to established resources needed.
Service Information:	Big Sandy Creek Bridge is still closed; however, the temporary bridge project continues. TNR will advise on estimation of completion. TNR is exploring an additional temporary option for secondary vehicle crossing on private property. Roadways and effected area remain congested with traffic and debris. Mass Care continues to provide services and resources to individuals affected by the flooding. Public Safety continues to support the search and recovery of missing individuals from the flood.

INCIDENT OBJECTIVES

Respond to life safety issues
Continue to provide essential services

8. UTILITY OUTAGES

POWER

	OUTAGE NUMBER	TOTAL CUSTOMERS	PERCENTAGE
Austin Energy	1	554813	0.00%

16. COMMODITY DISTRIBUTION

Two PODS are currently being operated in the community. One at the Church and the other across the bridge. Commodities are being ferried across in hand carts.

18. STATUS REPORTS

MASS CARE

Priorities:	1. Provide efficient, effective assistance to individuals and families affected by the flash flooding disaster in an accessible location. 2. Facilitate coordination and real-time information sharing between participating organizations responding to flash flooding impacts. 3. Identify and address gaps in goods, services, and recovery resources offered to flood-affected communities. 4. Ensure the safety and wellbeing of all staff, volunteers, and visitors at the resource center.
Actions:	•A Mass Care Branch has been stood up to support recovery efforts. Travis County HHS and APH are coordinating on these operations. Chris Crookham is currently the acting Mass Care Branch Deputy. Additional ELT support has been requested to serve as EOC Representatives over the weekend. •CHWs have been taken off standby. Further requests for assistance will be sent as necessary. •ATCMRC remains on standby to assist with the Recovery Resource Center. •PHEP staff members will remain on site at the Flood Recovery Resource Center through the weekend to assist in overseeing the operation.
Service Impacts:	Bridge is out, preventing people from reaching the recovery center or transporting items back to their homes.
Challenges:	We need an IAP, meeting cadence, the ICS structure, etc.
Notes:	0

TRANSPORTATION

Priorities:	Continue Resources Shuttle
Actions:	N/A
Service Impacts:	N/A
Challenges:	N/A
Notes:	You guys are doing great! :)

PUBLIC WORKS

Priorities:	No response
Actions:	No response
Service Impacts:	No response

Notes:	No response

COMMUNICATIONS

Priorities:	promote debris pick up promote capmetro shuttle for mail gather pictures
Actions:	Drafted and sent release on debris pick up posted on all social media accounts created and sent wct message
Service Impacts:	none
Challenges:	waiting on new volunteer plan so we can help promote.
Notes:	0

IMT	
Priorities:	Continue Search, Rescue, and Recovery Operations along Big Sandy Creek and Cow Creek. Continue repairs to critical infrastructure, including the primary bridge on Big Sandy Drive and Round Mountain Road. Maintain fire, EMS, and law enforcement services for the affected community. Continue vegetative clearing and debris removal operations, while accurately quantifying both vegetative and household waste to support recovery planning and documentation. Coordinate with local, state and national resources volunteer organizations.
Actions:	ISTAT and PSTAT Submissions, Road and Bridge Repairs, and Locating Viable Debris Management Sites in the affected areas.
Service Impacts:	Big Sandy Creek Bridge is inoperable. Travis County Road and Bridge is looking into immediate temporary solutions to rectify this major transportation issue via low water crossing and repairing part of the bridge that will hold heavier vehicles. Until a solution is solidified, around 133 Travis County residents in Pecan Hollow Ranches will continue to be affected due to lack of transportation across Big Sandy Creek. Search, Rescue, and Recovery operations will continue along Big Sandy Creek and Cow Creek.
Challenges:	Locating a viable Debris Management Site has been challenging, particularly in the Big Sandy Creek area. A Debris and Trash Drop Off is located at FM1431 Citizen's Collection Center and Travis County Transportation and Natural Resources is identifying additional locations near the affected area.
Notes:	N/A
PUBLIC SAFETY	
Priorities:	No response
